GRANT PROPOSAL: Emergency Health and Resilience for Israel's Ethiopian Community

Submitted by: Tene Briut (Health Promotion for the Ethiopian Community in Israel)

Project Lead: Avi Masfin, CEO

Grant Request: $50,000

Focus Area: Emergency Relief, Mental Health, and Healthcare Access

---

1. Executive Summary

Tene Briut, a leader in culturally competent healthcare for over 20 years, is seeking an emergency grant of **$50,000** to sustain and expand its crisis intervention services for the Ethiopian-Israeli community. As Israel navigates the current state of war, the Amharic-speaking population—particularly the elderly and new immigrants—faces significant barriers to accessing life-saving information and psychological support. Our mission is to ensure that no Ethiopian-Israeli is left behind due to language or cultural gaps during this national emergency.

2. Organization Background

Since its founding, **Tene Briut** has served as the vital bridge between the Israeli healthcare system and the Ethiopian community. Our staff consists of Amharic-speaking medical professionals, social workers, and health educators who understand the unique cultural nuances and historical trauma of our community. We promote health equity through advocacy, linguistic accessibility, and direct intervention.

3. Statement of Need

During times of conflict, the Ethiopian-Israeli community faces compounding vulnerabilities:

- **Information Gap:** Most emergency broadcasts and mental health resources are in Hebrew, leaving non-fluent speakers in a state of heightened anxiety.
- **Isolation of the Elderly:** Thousands of seniors live in isolation, unaware of how to access remote medical services or emergency rights.
- **Trust Deficit:** Community members are more likely to follow safety protocols and seek mental health support when the information comes from trusted, culturally familiar figures like **Dr. Seffefe Aycheh**.

4. Program Components & Implementation

To address the current crisis, Tene Briut has mobilized the following initiatives:

A. 24/7 Multi-Channel Hotline (Emotional & Functional Support)

We have expanded our Amharic and Tigrinya help-lines to operate 24/7.

- **Psychosocial Support:** Providing immediate emotional first aid to reduce trauma and stress.
- **Rights Access:** Assisting hundreds of families in navigating emergency labor laws, ordering chronic medications online, and accessing psychiatric care from home.

B. Proactive Outreach to At-Risk Seniors

Our team is conducting a "Tele-Check" campaign targeting **1,700 individuals aged 80+**.

- **Goal:** Alleviate chronic loneliness, verify physical safety, and identify unmet needs (food, medicine, shelter) to report to municipal authorities.

C. Culturally Tailored Emergency Communications

In partnership with the **Israeli Ministry of Health**, we are producing a series of professional information videos.

- **Content:** Guidance on safety instructions and mental health resilience featuring Ethiopian-Israeli nurses and social workers.
- **Distribution:** Social media, radio (Amharic), and community WhatsApp groups.

D. Strategic Resilience Webinars

In collaboration with **The Ministry of Health** we host webinars led by CEO Avi Masfin and Dr. Seffefe Aycheh to provide real-time updates and build community-wide resilience.

5. Budget Request: $50,000

The requested funds will be allocated as follows:

Category	Description	Amount
Staffing & Experts	Funding for Amharic-speaking therapists, social workers, and medical consultants.	$25,000
Hotline Operations	Technology, infrastructure, and 24/7 staffing of the help-lines.	$5,000
Digital Content	Production and distribution of professional emergency videos & radio spots.	$10,000
Outreach Logistics	Coordination of the proactive calling campaign for 1,700+ seniors.	$10,000
Total		**$50,000**
